

GSE - FER X Auction Results, 15 February 2026

Gestore dei Servizi Energetici (GSE), 15 February 2026. The second 2025-2026 FER X auction for utility-scale solar photovoltaic awarded a volume-weighted average tariff of EUR 72/MWh for projects reaching commercial operation between 2026 and 2027.

Combined with merchant PPA pricing of approximately EUR 78/MWh for the same vintage (per AFRY January 2026 reference curves), the blended effective revenue per MWh for solar portfolios structured with a 60/40 FER X / merchant mix is approximately EUR 75/MWh.
